AUSTIN REED

SS14

Austin Reed Women's Spring Summer 2014 collection takes a new direction, offering contemporary alternatives to traditional suiting for the modern working woman.

The season begins with a classic colour combination of navy, taupe and ivory with highlights of this season's dusted lavender and coral. Textured fabrics and angular panels create statement tailoring with a modern edge. Stripes, a key direction for the season, feature in shirts and knitwear.

The second story has a relaxed formality combined with a rustic elegance. A story of contrasts: the rustic with the elegant, the fluid with the structured. A palette of warm neutrals set against black with a highlight of chilli and sky blue.

High summer introduces a combination of 1950's modernist angles, contemporary tribal patterns and a bold monochrome palette with touches of soft pastels.

The result is fresh, clean and modern.
